PROPOSAL REQUIREMENTS
FOR
LIT FIBER SERVICES or DARK FIBER (E-RATE)
FOR
SANTA CLARA COUNTY OFFICE OF EDUCATION CONSORTIUM

SCOPE

The Santa Clara County Office of Education (SCCOE) E-Rate Consortium is seeking proposals for either lit fiber services or dark fiber solutions connecting School Districts Data Centers to the SCCOE campus at Ridder Park. Additionally, the SCCOE is seeking proposals for either lit fiber services or dark fiber solutions connecting the school district's individual school sites to District Data Centers, or other schools, which connect to the SCCOE campus at Ridder Park.

The SCCOE E-rate Consortium will be the awarding entity for this RFP to establish pricing, however individual Consortium members will leverage the pricing agreements with the winning service provider.

ENVIRONMENT

The Santa Clara County Office of Education is a Class II intermediate agency serving 33 K-12 and 4 community college districts. Direct instructional programs are provided to students with diverse needs, and include special, alternative, and migrant education, child development, and occupational training programs.

The Office also provides school districts with a wide range of support services in instruction, business, and personnel which enhance the districts' ability to provide a quality education for students. In many cases, these services meet California Department of Education requirements and link districts to the State system.

The Office has six major units (Administration, Business, Instruction, Human Resources, Technology, and Student Services), approximately 1,800 employees, and a budget which exceeds \$250,000,000.

REQUIREMENTS

The SCCOE E-rate Consortium has invested in a dark fiber network for which optical equipment was acquired and overlaid. The dark fiber network consists of five subtended rings which all hub at Santa Clara County Office of Education Main Campus at 1290 Ridder Park Drive, San Jose, CA 95131-2304. It was previously determined that this technology and configuration would allow for the most robust, easily expandable, and cost-effective solution for Consortium members into the future.

The object is to connect Consortium member sites to their District's Data Centers/Hubs, or other district sites, and to connect specific Consortium member hub sites to the Santa Clara County Office of Education Main Campus at 1290 Ridder Park Drive, San Jose, CA 95131-2304, via Fiber in as protected a way as possible. Therefore, to maintain technology consistency proposals structured to augment the protected ring infrastructure will be given greater weight.

The Santa Clara County Office of Education (SCCOE) E-Rate Consortium is seeking proposals for both lit and dark fiber solutions connecting school district sites and Data Centers, listed in Exhibit "A", to the SCCOE data center at Ridder Park. For the connection for Los Altos School Districts vendor may use one of the Alternative Connections listed in Exhibit "B" instead of the School District address in Exhibit "A". If lit fiber is proposed, then a minimum of 10Gbps is required. All fiber solutions should include maintenance terms and service level commitments.

The Santa Clara County Office of Education (SCCOE) E-Rate Consortium is also seeking proposals for both lit and dark fiber solutions connecting school district sites to District Data Centers/hubs, or other district sites,

listed in Exhibit "C". If lit fiber is proposed, then a minimum of 10Gbps is required. All fiber solutions should include maintenance terms and service level commitments.

The SCCOE Consortium current configuration of the dark fiber network is based upon five subtended rings which hub back to the data center at 1290 Ridder Park Dr. See SCCOE Ring KMZ 12.18.22.kmz.

School Districts Data Centers to the SCCOE campus DARK FIBER ONLY

- Direct addition to an existing ring

The node will connect to an existing ring at two separate points while maintaining full path diversity and resiliency for all existing nodes. New fiber paths must therefore connect between adjacent sites on the existing ring.

- Protected spur into an existing ring

The node will be connected (spurred) via two diverse paths wherein more than 50% of the fiber distance will traverse a separate path before converging at a single existing ring node site. Both east and west side fiber paths may enter and exit the nodes via single pathway (last-mile) builds. This configuration will require two separate pairs of fiber be terminated at both the newly added node site and the existing node site out of which it is being spurred.

- Non-protected spur into an existing ring

The node will be connected (spurred) via a single path to a single existing ring node site. This configuration will require a single pair of fiber to be terminated at both the newly added node site and the existing node site out of which it is being spurred.

- New ring(s) or new ring(s) and spurs

New ring(s) must have two separate entry points while maintaining full path diversity and resiliency at the hub site.

New fiber may be protected spurs into new ring(s). The node will be connected (spurred) via two diverse paths wherein more than 50% of the fiber distance will traverse a separate path before converging at a single new ring node site. Both east and west side fiber paths may enter and exit the nodes via single pathway (last-mile) builds. This configuration will require two separate pairs of fiber be terminated at both the newly added node site and the node site out of which it is being spurred.

New fiber may be non-protected spur into a new ring. The node will be connected (spurred) via a single path to a single new ring(s) node site. This configuration will require a single pair of fiber to be terminated at both the newly added node site and the new node site out of which it is being spurred.

LIT FIBER SERVICES OR DARK FIBER

-Direct hub-and-spoke connection to the Ridder Park datacenter

The new node will be connected directly to the Ridder Park data center at 1290 Ridder Park Dr. Here both lit and dark fiber solutions will be accepted however if dark fiber is proposed then final cost effectiveness will be determined by combining the dark fiber proposal cost with the cost of the equipment needed to connect the site to SCCOE. The dark fiber equipment will be acquired via a separate concurrent RFP.

All dark fiber proposals must include at minimum along with the per-site cost, specification of connection type per the above list and percentage of aerial versus underground fiber in the build.

See Exhibit "C" below for a suggested proposal format. All bidders are encouraged to bid ALL sites as well as any combination of districts and school sites that they determine are or would be beneficial to cost proposal.

All costs associated with splicing into the existing ring network fiber must be accounted for in proposals to connect new sites.

For connection to Los Altos School District, preferred termination would be at the District Office at 201 Covington Road listed in Exhibit "A", but as an alternative we will consider connecting at either of the two Los Altos Schools listed in Exhibit "B". If terminating at one of the LASD schools, Almond would be the preferred school. Please price all options for Los Alto SD.

Please price each connection individually. The SCCOE and school districts reserve the right to elect to participate after reviewing the proposals. The SCCOE and school districts reserve the right to select the most favorable and appropriate solution for their situation. Proposal may include options combining connection of multiple School District to the SCCOE Campus.

In the event of a price decrease for service or from the manufacturer, said decrease shall be passed on to the Santa Clara County Office of Education E-rate Consortium and documented with new price sheet sent to the SCCOE Main Campus.
13. All equipment/services costs must be new and included and identified separately.
14. Manufacturer must warrant all parts and equipment.
15. Vendor must be a certified reseller of parts and equipment.
16. Vendor can provide alternative financing options compatible with the E-Rate program, if available.
17. Vendor must participate in the California Teleconnect Program.
