

**E RFP 07_24_25 SCCOE CONSORTIUM KIEFER HUB
(E-RATE)**

Questions and Answers

- 1) For Evergreen SD you have the hub location for your RFPs listed as 3188 Quimby Rd. It is our understanding that their data center is at their MOT building, which is 2976 Fowler Rd. Can you please confirm if 3188 Quimby Rd is where new circuits should be terminated?

The SCCOE E-rate Consortium had a typographical error on the address for Evergreen School District. The correct address is 2976 Fowler Rd, San Jose, CA 95135. Please make any necessary changes.

- 2) For the Kifer Hub RFP is it ok for service providers to drop services at the Lumen 0 Manhole and the SCCOE Consortium be responsible for the cross connect into the Lumen facility?

Services must be brought into the Lumen facility to the provider's cage. The SCCOE E-rate Consortium will also request a proposal for rack space to host our equipment, outside of E-rate, as a part of this project.
