PROPOSAL REQUIREMENTS
FOR
LIT FIBER SERVICES or DARK FIBER (E-RATE)
FOR
SANTA CLARA COUNTY OFFICE OF EDUCATION CONSORTIUM

SCOPE

The Santa Clara County Office of Education (SCCOE) E-Rate Consortium is seeking proposals for either lit fiber services or dark fiber solutions connecting school district sites and Data Centers to the SCCOE campus at Ridder Park.

ENVIRONMENT

The Santa Clara County Office of Education is a Class II intermediate agency serving 33 K-12 and 4 community college districts. Direct instructional programs are provided to students with diverse needs, and include special, alternative, and migrant education, child development, and occupational training programs.

The Office also provides school districts with a wide range of support services in instruction, business, and personnel which enhance the districts' ability to provide a quality education for students. In many cases, these services meet California Department of Education requirements and link districts to the State system.

The Office has six major units (Administration, Business, Instruction, Human Resources, Technology, and Student Services), approximately 1,800 employees, and a budget which exceeds \$250,000,000.

REQUIREMENTS

The SCCOE E-rate Consortium has invested in a dark fiber network for which optical equipment was acquired and overlaid. The dark fiber network consists of five subtended rings which all hub at Santa Clara County Office of Education Main Campus at 1290 Ridder Park Drive, San Jose, CA 95131-2304. It was previously determined that this technology and configuration would allow for the most robust, easily expandable and cost-effective solution for Consortium members into the future.

The object is to connect Consortium members and Data Centers to the Santa Clara County Office of Education Main Campus at 1290 Ridder Park Drive, San Jose, CA 95131-2304, via Fiber in as protected a way as possible. Therefore, in order to maintain technology consistency proposals structured to augment the protected ring infrastructure will be given greater weight.

The Santa Clara County Office of Education (SCCOE) E-Rate Consortium is seeking proposals for both lit and dark fiber solutions connecting school district sites and Data Centers, listed in Exhibit "A", to the SCCOE data center at Ridder Park. If lit fiber is proposed then a minimum of 10Gbps is required. All fiber solutions should include maintenance terms and service level commitments.

The SCCOE Consortium current configuration of the dark fiber network is based upon five subtended rings which hub back to the data center at 1290 Ridder Park Dr. See SCCOE Post Sale Zayo Rings_8152018.kmz.

The Consortium will accept four different options for newly proposed sites:

DARK FIBER ONLY

-Direct addition to an existing ring

The node will connect to an existing ring at two separate points while maintaining full path diversity and resiliency for all existing nodes. New fiber paths must therefore connect between adjacent sites on the existing ring.

-Protected spur into an existing ring

The node will be connected (spurred) via two diverse paths wherein more than 50% of the fiber distance will traverse a separate path before converging at a single existing ring node site. Both east and west side fiber paths may enter and exit the nodes via single pathway (last-mile) builds. This configuration will require two separate pairs of fiber be terminated at both the newly added node site and the existing node site out of which it is being spurred.

-Non-protected spur into an existing ring

The node will be connected (spurred) via a single path to a single existing ring node site. This configuration will require a single pair of fiber to be terminated at both the newly added node site and the existing node site out of which it is being spurred.

-New ring(s) or new ring(s) and spurs

New ring(s) must have two separate entry points while maintaining full path diversity and resiliency at the hub site.

New fiber may be protected spurs into new ring(s). The node will be connected (spurred) via two diverse paths wherein more than 50% of the fiber distance will traverse a separate path before converging at a single new ring node site. Both east and west side fiber paths may enter and exit the nodes via single pathway (last-mile) builds. This configuration will require two separate pairs of fiber be terminated at both the newly added node site and the node site out of which it is being spurred.

New fiber may be non-protected spur into a new ring. The node will be connected (spurred) via a single path to a single new ring(s) node site. This configuration will require a single pair of fiber to be terminated at both the newly added node site and the new node site out of which it is being spurred.

LIT FIBER SERVICES OR DARK FIBER

-Direct hub-and-spoke connection to the Ridder Park datacenter

The new node will be connected directly to the Ridder Park data center at 1290 Ridder Park Dr. Here both lit and dark fiber solutions will be accepted however if dark fiber is proposed then final cost effectiveness will be determined by combining the dark fiber proposal cost with the cost of the equipment needed to connect the site to SCCOE. The dark fiber equipment will be acquired via a separate concurrent RFP.

All dark fiber proposals must include at minimum along with the per-site cost, specification of connection type per the above list and percentage of aerial versus underground fiber in the build.

See Exhibit "D" below for a suggested proposal format.

All costs associated with splicing into the existing ring network fiber must be accounted for in proposals to connect new sites.

For connection to Los Altos School District, preferred termination would be at the District Office at 201 Covington Road list in Exhibit "A", but as an alternative we will consider connecting at either of the 2 Los Altos Schools listed in Exhibit "B". If terminating at one of the LASD schools, Almond would be the preferred school. Please price all option for Los Alto SD.

Please price each connection individually. The SCCOE and school districts reserve the right to elect to participate after reviewing the proposals. The SCCOE and school districts reserve the right to select the most favorable and appropriate solution for their situation. Proposal may include options combining connection of multiple School District to the SCCOE Campus.

TIME LINES

Preference for installation of new sites, listed in Exhibit "A" and/or "B" to be completed before June 30, 2022.

E-RATE and CTF FUNDING

Execution of the contract will be contingent upon E-rate funding. Annual continuation of the contract will be contingent upon E-rate funding for that year. Services must be eligible for E-rate and CTF (California Teleconnect Fund) discounts. Vendor must be authorized and registered with the USAC (Universal Service Administrative Company) with valid SPIN and up-to-date Form 498 at time of services rendered. Vendors must have available CTF/DAS discounts through the CPUC.

SCCOE and districts may elect to proceed with contract(s) before E-rate funding approval.

PRICING

Please provide pricing for 36-month with two one-year voluntary extensions, and/or 60-month contract terms in your proposal. Preferred contract end date will fall on June 30. Term of service should be July 1, 2022 to June 30, 2025, with two voluntary one-year extensions to June 30, 2026 and June 30, 2027, or a 60-month contract from July 1, 2022 to June 30, 2027. If appropriate, include pricing for different levels of service (bandwidth/CIR). Include provisions for bandwidth/CIR increases and addition of more ports, during the term of the contract. Please include all estimated taxes, fees, and surcharges in all proposals. Please price each site connection individually. In addition to individual pricing, vendors may also provide pricing for groups of sites. SCCOE and Districts reserve the right to select the most favorable and appropriate solution for each site situation. Include any one-time installation costs, if any. Include costs to extend service from MPOE to the MDF/IDF at each site. Include single year and multi-year contract options if available. Please include after term pricing.
