

ADDENDUM #2

August 25, 2026

BID# iB 02 26 27

CHRISTOPHER RANCH PLAYGROUND TURF

FOR

SANTA CLARA COUNTY OFFICE OF EDUCATION

This Addendum forms a part of the Bid Documents for above project and modifies the original project specifications as noted below. Please acknowledge receipt of this Addendum in your Quote. Failure to do so may subject your response to disqualification.

Part #1: Responses to Questions received prior to Mandatory Jobwalk:

Question	Response
1. Please consider changing the required contractors license type for this scope of work. The scope of work is for a dedicated playground safety surfacing replacement which requires the license type of C61/D12 - SYNTHETIC PRODUCTS. A C27 Landscaping does not cover safety surfacing within a playground area.	The specified contractor classification will remain as currently identified in the solicitation.
2. SpectraTurf would like to submit our PlayGrass system to be reviewed and approved as an equal product. Attached you will find our submittal packet which also includes our installation details. SpectraTurf uses an SBR cushion layer and does not use any nails or staples within the playground installations due to the safety hazard they create.	The District has not completed its review and no determination regarding equivalency or acceptability has been made at this time. Until such determination is made through the bid review process, bidders shall base their proposals on the requirements set forth in the contract documents.
3. Can you please tell me the days to completion for this project, and if there is an engineer's estimate?	Conceptual Schedule: - NTP November 2026 - Fingerprinting / Certification: February 2027 - Completion: Early Spring 2027 No Engineer's Estimate Available.

4. I see that this is possibly the second time this project has come up as it looks like there were documents from April on your portal. In some of the photos, it looks like the playground equipment had caution tape around some areas. Has the playground equipment been fixed, or do you plan on replacing the material in an additional bid? The scope of work outlines "Existing Structures" as a base bid, so I am curious if you are looking for any help in replacing the structure in the future or as additional scope of work.	Reference Attachment 4.1 Scope of Work Plans, Sheet #04, Section 5, 'Existing Structures.'
